

#### § 382.4

(1) The voyage shall be round-trip with the return in ballast to a port or port range selected by MARAD as the most appropriate, unless the vessel is scrapped or sold after discharge of the preference cargo and does not return to the United States as a U.S.-flag vessel. In this event, only voyage days from the load port to the discharge port, including time allowed to discharge, shall be included.

(2) Cargo is loaded and discharged as per cargo tender terms interpreted in accordance with the "International Rules For the Interpretation of Trade Terms" (INCOTERMS) published by the International Chamber of Commerce.

(3) Total loading and discharge time includes the addition of a factor to account for delays and days not worked.

(4) One extra port day is included at each anticipated bunkering port.

(5) An allowance shall be included for canal transits, when appropriate.

(6) Transit time shall be based on the average speed of vessels in the category. When calculating the vessels' average speed, individual vessel speeds will be reduced by five percent for self-propelled vessels and ten percent for tugs/barges to account for weather conditions.

(f) *Determination of cargo carried.* The amount of cargo tonnage used to calculate the rate shall be based on the tender offer or charter party terms. In instances when separate parcels of preference cargo are booked or considered for booking on the same vessel, whether under a single program or different programs, a guideline rate shall be provided based on the combined voyage.

(g) *Total rate.* The guideline rate shall be the total of the operating cost component, the capital cost component, the port and cargo handling cost component, and the broker's commission and overhead component. The fair and reasonable rate can be expressed as total voyage revenue or be divided by the amount of cargo to be carried, as prescribed in paragraph (f) of this section, and expressed as cost per ton, whichever MARAD deems most appropriate.
